All engine repair parts are still generally available for the Dover and Dorset series, as well as the 4D220 Ebro engines, together with most of their Lehman Marinising parts, although some new parts are not available. We can also supply some engine parts for the Peugeot based 4D50 and 4D61, and although almost all of the original Marinising parts for these are no longer available, we are able to offer suitable alternatives.

R&D Engine drive plates brochure

If replacing an existing drive-plate please check if a plate code (XX-XX-XX) is present.

The plate code (XX-XX-XX) consists of a Spline Plate number, followed by the Element code followed by the Back-plate (Flywheel) number.

Please contact for a precise Driveplate matching for your Engine & Gearbox combination.

The earlier loop type element designs have generally been replaced by High deflection & Hammer Head damper elements which further redu

Driveplates are listed by Gearbox (Spline type) and Plate diameter (OD). Please check the selection sheet and Backplate list for flywheel comp

Driveplates marked XX-XX-99 are for custom backplates, where a drive plate has been made fa a custom PCD, number of holes and hole diam

If your required driveplate is not listed please contact. We can match from more than the 800 buildable combinations.

TWIN-DISC		
MODEL	GEARBOX DESCRIPTION	PRICE
MG-5050A	Lightweight gearbox for leisure crafts and smaller fishing vessels.	POA
MG-5061A	Compact gearbox with a high torque rating, ideal for commercial vessels.	POA
MG-5065SC	Compact and efficient gearbox for smaller vessels.	POA
MG-5075A	Lightweight and versatile, suitable for medium-duty marine applications.	POA
MG-5082A	High-performance gearbox for larger vessels, capable of handling heavy loads.	POA
MG-5085SC	Lightweight model offering superior power transmission.	POA
MG-5145SC	Durable gearbox designed for long-term reliability in tough environments.	POA
MG-5185A	Heavy-duty gearbox with advanced cooling for high-output applications.	POA
MG-5217A	Designed for large yachts and commercial vessels requiring high durability.	POA
MGX-5065A	Efficient and durable gearbox for long-term reliability in coastal vessels.	POA
MGX-5075SC	QuickShift gearbox offering smooth, clutch-free shifting.	POA
MGX-5090A	Gearbox with advanced electronic controls for optimal fuel efficiency.	POA
MGX-5114A	Electronic control gearbox with precision handling for demanding conditions.	POA
MGX-5126A	Designed for medium-duty vessels with precise control needs.	POA
MGX-5135SC	Compact QuickShift gearbox for smaller vessels needing high responsiveness.	POA
MGX-5145A	Heavy-duty gearbox for tugboats and commercial shipping.	POA
MGX-5170SC	Compact model with smooth operation for pleasure crafts.	POA
MGX-5202	Robust gearbox with integrated electronic controls for precision operation.	POA
MGX-5222	High-capacity gearbox for use in workboats and high-speed crafts.	POA
MGX-5226A	Large gearbox for powerful vessels, ideal for ocean-going applications.	POA

TWIN-DISC		
Part Name	DESCRIPTION	PRICE
Clutch Plates	Friction and steel plates for smooth gear engagement and disengagement.	POA
Seals and O-Rings	Used to prevent oil leakage and maintain hydraulic integrity.	POA
Oil Filters	Replaceable filters to ensure the gearbox remains free of debris and contaminants.	POA
Bearings	Includes needle bearings, tapered roller bearings, and thrust bearings for shaft alignment.	POA
Shafts	Input and output shafts for transmitting power between the engine and propeller.	POA
Gaskets	Gasket kits for sealing gear housings and hydraulic systems.	POA
Selector Valves	Hydraulic or mechanical valves for gear selection.	POA
Cooler Assemblies	Oil coolers to regulate gearbox operating temperatures.	POA
Speed Sensors	Used to monitor and report shaft speed to the gearbox control system.	POA
Control Units	Electronic or mechanical control units for gear shifting and throttle synchronization.	POA
Shift Cables	Linkage cables for manual gear shifting.	POA
Oil Pumps	Pumps to circulate lubrication oil throughout the gearbox system.	POA
Needle Cages	Bearing components for rotating shafts.	POA
Bell Housings	Enclosures connecting the engine to the gearbox.	POA
Springs	Used in clutch assemblies and selector mechanisms.	POA
Vent Valves	Prevents pressure buildup in the gearbox housing.	POA
Speedi-Sleeves	Shaft repair sleeves for worn or damaged shafts.	POA
Thrust Washers	Provides axial support and reduces wear between rotating components.	POA
Hydraulic Filters	Ensures clean hydraulic fluid in gearboxes with advanced hydraulic systems.	POA

Applicability: These parts are standard across **MG** and **MGX** Twin Disc marine gearboxes.

Critical Items: Components like clutch plates, seals, bearings, and oil filters are considered routine spares.

FEATURED SPARES KITS		
Part Name	DESCRIPTION	PRICE
Clutch Kit for MG-5061A	Includes: Friction discs, steel plates, and springs.	POA
Oil Seal Kit for MGX-5075SC	Includes: Shaft seals, O-rings, and gaskets.	POA
Complete Repair Kit for MG-5082A	Includes: Bearings, seals, gaskets, and assembly components.	POA

Intended for Sailboat 6-10 knots application

Props are also available with heavy edges for canal and beach boats, with pitches about 6" to 8" lower than the standard. Boring of propeller (to suit your taper requirements typically 1:12 Imperial, 1:10 Metric): £75

Powerline has a higher skew, higher rake for smoother performance.

Standard Prop Pitches are limited to the same or lower as the diameter. For Pitch/diameter ratios 1.5:1 or higher. Propellers are cast in Manganese Bronze or in Nickel Aluminium Bronze and finished to required shaft finish. In stock propellers can be supplied within a week. If a factory order is required, delivery takes 8-12 weeks from casting. Stock castings are mostly right hand (RH) rotation, however some stock is held for left hand rotation, please check. Special adaptations possible see notes at bottom of page.

Higher skew, higher rake for smoother performance

Boring of propeller (to suit your taper requirements typically 1:12 Imperial, 1:10 Metric): £75

Powerline has a higher skew, higher rake for smoother performance.

Standard Prop Pitches are limited to the same or lower as the diameter. For Pitch/diameter ratios 1.5:1 or higher, custom propellers are cast in Manganese Bronze or in Nickel Aluminium Bronze and finished to required shaft from available stock. In stock propellers can be supplied within a week. If a factory order is required, delivery takes 8-12 weeks from casting. Stock castings are mostly right hand (RH) rotation, however some stock is held for left hand rotation, please check with us. Special adaptations possible see notes at bottom of page.

Waterjet Booster System - Enhances acceleration and high-speed performance for demanding operations.

CAN-Bus Control System - Centralized and seamless integration with vessel electronic controls.

Joystick Control - Precision control for docking and tight maneuvering.

Alternative Materials - High-grade stainless steel or aluminum construction for durability in harsh marine environments.

Clear Duct Option - Allows visual inspection of reverse bucket and duct components for easy maintenance.

Auxiliary Cooling System - Dedicated cooling system for gearbox and hydraulics under high-load or tropical conditions.

Reduced Noise Package - Sound-dampening features to minimize noise for passenger or eco-sensitive applications.

Hydraulic Steering and Reverse - High-precision hydraulic controls for steering and reverse bucket actuation.

Custom Paint and Coating - Wear-resistant coatings to match vessel aesthetics or improve durability in extreme conditions.

Heat exchangers for Battery, Power Electronics - Inverter and E-Motor/Machine application

Cupro Nickel cored coolers available from our standard raange see Page 28.

Indicated performance of Bowman titanium heat exchangers is given using 50/50 water/glycol coolant, with 40°C coolant outlet temperature and 30°C seawater in Heat exchangers with aluminium body, titanium tubes, composite end covers and EPDM seals suitable for cooling electric and hybrid propulsion systems and equipr Required information: Coolant type and concentration Heat to be dissipated in kW Required coolant outlet temperature in deg C, Coolant flow in L/min, Seawater ten Larger size heat exchangers are also available for systems that require greater heat dissipation.

ENGINE EXHAUST SYSTEMS

During the operation of any marine engine-gas or diesel-exhaust gases are produced and must be removed from the engine and conducted outside the boat. While there are two bas

EXHAUST MANIFOLD

Attached to the engine is an exhaust manifold with its exhaust inlets matching the exhaust outlet ports of the engine.
Circulating cooling water through the water jacket surrounding the exhaust gas chamber cools this manifold.

EXHAUST CONNECTOR

At the exhaust end of the manifold is an exhaust connector. This connector is an intermediary between the manifold and an exhaust hose or pipe. Tis connector also mixes the exhaue
height difference between the center line of the exhaust end of the center line of the transom overboard exhaust fitting, the exhaust connector
can an be exhaust dump or drop of a convenient angle. In those instances where the manifold is not appreciably above or is below the overboard fitting, an exhaust riser is used. By

BACK PRESSURE

From an engineering viewpoint, the most critical design requirement for exhaust systems is to limit the backpressure on the engine to a minimum. Backpressure is the pressure that
gases and to prove for a uniform gas flow away from all cylinders. Barr manifolds and exhaust connectors are designed to minimize backpressure. In many cases, after replacing an

How to find us at Lancing Marine

Opening hours 8.30 AM to 5.30 PM, Monday to Friday. Closed on Bank Holidays.

Mike Bellamy
winner of the
world's longest
powerboat race

By Road - Post Code BN41 1XY From London and the M25

Take the M23 for Brighton. This becomes the A23 after Gatwick Airport. About 3 miles outside Brighton follow the signs for the A27 westwards towards Worthing. Proceed to the second exit and follow the signs to Portslade. Turn left at T-junction and then right at the traffic lights. Follow the road down to Portslade railway station, where you turn right just in front of the railway crossing into Victoria Road.

From the West

After crossing the river Adur at Shoreham flyover on the A27, proceed towards Brighton through tunnel. Then take the next exit, signed Portslade and West Hove, and follow the Portslade signs. Turn left at T-junction and then right at the lights. Follow the road down to Portslade railway station, where you turn right just in front of the railway crossing into Victoria Road.

By Rail

Train from London, Victoria, destination either Littlehampton or Worthing, to Portslade station. Some trains do not stop at Portslade, in which case change onto the local service 'Coastway West' at Hove and travel one or two stations to 'Portslade and West Hove' station. On leaving the station cross the level crossing and turn left into Victoria Road. From Portsmouth, all Brighton trains stop at Portslade.

By Sea

Car Ferries - Via Portsmouth

Leave the docks and follow the signs to the Motorway. Follow 'M27 Brighton' signs onto the A27. Then proceed as 'From West'.

Via Sheerness, Dover, Ramsgate or Folkestone.

Follow the signs to London until you reach the M25. Follow the route signposted 'Gatwick airport' until you reach the M23. Then proceed as 'From London'.

Via Newhaven

Leave ferry terminal following 'Lewes' signs and join A27 going West. Then proceed as 'From London'.

By private yacht

Moor in Brighton Marina, approximately 4 miles East of town centre (They listen on channel 80). Take a rental car from close to the Eastern pier and follow the signs to Brighton or phone 01273 204060 for a taxi.

By Air

Via London Heathrow

Take underground tube train (London Transport) to Victoria, transfer to main line railway station and proceed as 'By Rail'.

Via Gatwick

Take the Littlehampton or Worthing train and proceed as 'By Rail'.

By Private Plane

Go to Shoreham Airport, where taxis are readily available by telephone at exit from main terminal.
